

At SANEON, our greatest passion is the challenge. The safe development of autonomous and automated transport systems (from vehicles to aircraft) is the focus of our interest. In the development of these complex systems, we support and advise global players in the automotive, railway and aviation industries. Through our knowledge and strong analytical approach, we empower our clients to make their visions come true.

We offer as of now (flexible 20 – 20 hours per week):

Working Student (m/f/d) IT Service Management

Your tasks

- You administrate and maintain our local and cloud-based IT infrastructure
- You support our employees with technical questions in first- and second-level support remotely and on site
- You will support our HR team in enabling our new employees to get off to a smooth start
- You manage our technical asset management
- You take on IT projects to optimize and simplify our processes

Your profile

- Ongoing studies of a computer science subject or natural science subject related to computer science
- Knowledge of the administration of Windows environments, networks and Office 365
- A careful, analytical mindset and a high willingness to learn
- A solution-oriented, self-reliant and structured way of working
- Good communication and team skills
- Very good english

What we offer you

- Collaboration on forward-looking topics and development processes
- A high degree of personal responsibility
- Flat hierarchy and open communication structures
- A familiar and productive working atmosphere in an international environment in which you feel comfortable and can play a decisive role in shaping the company
- Freedom in the organization of your working hours
